July 14, 2010

State Board;

This Friday, the Sacramento Superior Court will hear a request by DPA to compel the State Controller to pay minimum wage to state employees. CCPOA has petitioned to intervene, as well have several other groups. The Controller has filed extensive documentation in defense of his position to NOT pay minimum wage.

Of particular interest, are the declarations submitted by former and current Controller personnel regarding how DPA has dealt with them in the past as compared to present.

These filings are too large to include with this message but we will post a link and or the actual documents on the CCPOA page within the next few hours. Please share this with your members. We will provide any new information regarding this case as it develops.
